TROLLS OF JOTUNHEIM

To the east, my son, there lies a vast, dark forest. Therein, the trollwives breed monstrous wolves, called Vargr by some who know better. It is foretold that one day, the greatest of these wolves will take to the sky and swallow the moon. It is an accursed place, filled with all the horrors of the night. Do not tread there.

In the harsh wilds of the realm of Jotunheim, the trolls, a monstrous breed of jotun, wage eternal war with the men who fear them, the giants who despise them, and the gods who ignore them. These varied and misshapen creatures hide from the light of the sun, and breed armies of hybrid monstrosities beneath the branches of the haunted Ironwood.
